ADITYA RAJ

JAVA BACKEND DEVELOPER | WEB & ANDROID DEVELOPER

PROFESSIONAL SUMMARY

Developer focused on Java backend engineering, with hands-on project experience building Android applications using Java/XML and backend services using Spring Boot, REST APIs, JPA/Hibernate, and SQL. Also experienced in responsive web interfaces, object-oriented programming, and data structures and algorithms; solved 400+ coding problems across online platforms.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, REST APIs, JDBC, Hibernate, JPA
Core Concepts: Core Java, OOP, Data Structures and Algorithms
Android: Android (Java), XML Layouts, MVVM, ViewModel, LiveData, Room, Retrofit
Web: HTML5, CSS3, React, TypeScript, GSAP, ScrollTrigger, Canvas API
Databases & Tools: MySQL, PostgreSQL, Git, GitHub, Postman, Android Studio, VS Code, Linux/Ubuntu, Maven, Gradle

EXPERIENCE

Android App Development Intern | Inspireleap | Oct 2025 – Dec 2025

- Completed a hands-on Android app development internship, contributing to practical application implementation and strengthening Java development, debugging, and collaboration skills.

SELECTED PROJECTS

KHATA – Shared Expense Management App | **In Development**

Java, Android XML, MVVM, Room, Retrofit, Spring Boot, REST APIs, Spring Security, JPA/Hibernate, MySQL

- Developing an Android application for household groups to record shared expenses, split costs, track member balances, and manage settlements.
- Building the Spring Boot backend with REST endpoints and JPA repositories, alongside Android data integration using Room and Retrofit.

Valoura - Live Website

- Deployed a web project to production on Vercel and managed its source-code versioning and deployment workflow using Git and GitHub.

Apple Vision UI – Web Application

HTML5, CSS3, JavaScript, GSAP, ScrollTrigger, Canvas API

- Built a responsive Apple Vision Pro-inspired web interface with scroll-driven animations and interactive Canvas visuals.

KrishiMitra – AI-Based Crop Recommendation System | Team Project

Java, Python, Scikit-learn, React, TypeScript, PWA

- Collaborated in a four-member team to build a crop recommendation platform; evaluated 22 machine-learning algorithms and selected Extra Trees based on accuracy and inference latency.
- Developed a multilingual PWA interface with offline fallback content and an agriculture economics dashboard.

EDUCATION

B.Tech, Computer Science and Engineering | Technocrats Institute of Technology, Bhopal (RGPV) | 2022–2026 | CGPA: 7.0
Class XII: S.B.S +2 H/S, Lakhisarai, Bihar (BSEB) | 71% | 2021–2022
Class X: Gauri Shankar H/S, Katehar, Lakhisarai, Bihar (BSEB) | 71% | 2019–2020

CERTIFICATIONS & ACHIEVEMENTS

- Web Development Course – Rinex, in association with E-Cell, IIT Bhubaneswar (Dec 2025 – Jan 2026).
- Solved 400+ coding problems across CodeChef, HackerRank, GeeksforGeeks, and LeetCode, including 100+ on LeetCode.

Languages: English (Fluent), Hindi (Native) | Strengths: Problem-Solving, Communication, Time Management
