ADITYA RAJ

WEB & APP DEVELOPER | JAVA BACKEND DEVELOPER

+91 9263605950 • adityaraj81156@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Web & App Developer focused on Java backend engineering, with hands-on project experience building Android applications using Java/XML and backend services using Spring Boot, REST APIs, and relational databases. Also experienced in responsive web interfaces, object-oriented programming, and data structures & algorithms; solved 400+ coding problems across online platforms.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, REST APIs, JDBC, Hibernate, JPA
Android: Android (Java), XML Layouts, MVVM, ViewModel, LiveData, Room, Retrofit
Web: HTML5, CSS3, React, TypeScript, GSAP, ScrollTrigger, Canvas API
Databases & Tools: MySQL, PostgreSQL, Git, GitHub, Postman, Android Studio, VS Code, Linux/Ubuntu, Maven, Gradle

EDUCATION

Technocrats Institute of Technology, Bhopal | RGPV | 2022–2026
B.Tech, Computer Science and Engineering • CGPA: 7.0

EXPERIENCE

Android App Development Intern | Inspireleap • Oct 2025 – Dec 2025
- Completed a hands-on Android app development internship, contributing to practical application implementation and strengthening debugging, problem-solving, and collaboration skills.

SELECTED PROJECTS

KHATA – Shared Expense Management App | *Java, Android XML, MVVM, Room, Retrofit, Spring Boot, REST APIs, Spring Security, JPA/Hibernate, MySQL/PostgreSQL*
- Developed an Android-based shared expense management application for flatmates, with modules for authentication, group creation/joining, expense tracking and splitting, member balances, and settlements.
- Built the companion Spring Boot backend and Android data layer; added bill reminders, monthly reporting, PDF export, and QR/invite flows.
  GitHub Repository

Apple Vision UI – Web Application | *HTML5, CSS3, JavaScript, GSAP, ScrollTrigger, Canvas API*
- Created a responsive, high-fidelity recreation of the Apple Vision Pro website, featuring scroll-driven animations and interactive Canvas visuals.
  GitHub Repository

KrishiMitra – AI-Based Crop Recommendation System (Team Project) | *Java, Python, Scikit-learn, React, TypeScript, PWA*
- Collaborated in a four-member team to build a crop recommendation platform; evaluated 22 machine-learning algorithms and selected Extra Trees based on accuracy and inference latency.
- Developed a multilingual PWA interface with offline fallback content and an agriculture economics dashboard.

SortifyMaster – Sorting Algorithm Visualizer | *HTML, CSS, JavaScript*
- Built an interactive web app to visualize Bubble, Selection, Insertion, Merge, Quick, and Heap sort with adjustable array size and animation speed.

CERTIFICATIONS & ACHIEVEMENTS

- Completed Web Development Course, Rinex in association with Entrepreneurship Cell, IIT Bhubaneswar (Dec 2025 – Jan 2026).
- Solved 400+ coding problems across CodeChef, HackerRank, GeeksforGeeks, and LeetCode (including 100+ on LeetCode).
